Равно ли равно равно?

От множеств к высшим категориям, или почему равенство имеет размерность

(некоторые объекты более равны, чем другие)

$$2 + 2 = 4$$

$$2 + 2 = 4$$

$$a^2 + b^2 = c^2$$

$$2 + 2 = 4$$

$$a^2 + b^2 = c^2$$

$$0^0 = 1$$

Inequalities in pure mathematics [edit]

Analysis [edit]

- Agmon's inequality
- Askey–Gasper inequality
- Babenko–Beckner inequality
- Bernoulli's inequality
- Bernstein's inequality (mathematical analysis)

- Harnack's inequality
- Hausdorff–Young inequality

Вальдо

Закон Лейбница

$$a = b \overset{\text{def}}{\iff} \forall \Phi \quad (\Phi(a) \Leftrightarrow \Phi(b))$$
